Open Source contributions
Gnome boxes, GUADEC 2019 app development, OnsenUI, flutter/pluggins, dotnet, qmk project etc.

📅 March 2019 – Present

PROJECTS

Contacts App (Chhariya Uneval Brahmasamaj application)
- Created a telephone directory android application for my community people. It has contact information of everyone and can only be accessed by the community people. It is also available on the Google Play Store.

Auction App
- Made an auction android application for a college competition. In this, a person needs to create his/her account and then can put personal items for auction and can also bid on others' items.

Hostel Management Project using C++
- As a course project, I, in a team, made a Hostel Management system in C++. In this, there are different accounts for students and admins. Students can apply for a room and admins can check the room availability and assign. Student can also fill up leave application and application for guest rooms of their relatives want to stay.

DoggoBot
- Using python, I made a Telegram Bot to send dog images whenever you type '/woof' and cat images on sending '/purr'. I used separate APIs for both.

SKILLS

C   C++   Python   HTML
CSS   JavaScript   MySql
Android & iOS App Development
UX Design (Adobe Photoshop)
